

airQ Whole Home Clean Air

airQ brings fresher, drier, cleaner, filtered air into your home

Reduce condensation and mold, dry your home, improve indoor air quality, push out allergens, toxins & pollution, keep your home fresh and more.

Feature	Benefit
Wildfires and smokers	Be comfortable indoors during wildfires. Keep the air in your home clear of smoke and ash, whether from wildfire or a neighbor smoking.
Touch screen controller	Set and forget with an intuitive and user-friendly interface. The system monitors and responds to air quality issues automatically around the clock.
Surgical grade HEPA filter plus active carbon and silver ion filters	Filters airborne allergy triggers, pollen, mold spores, dust particles, chemicals, and toxins from the air in your home. Surgical grade HEPA (MERV-16) filtration improves air quality and helps reduce triggers for asthma and allergies.
Improved air quality with positive pressure	Reduces condensation, moisture, mold, and allergens through continuous ventilation. Helps prevent pollen and other allergens from getting into your home.
Actively works to remove toxins, pollution, carbon dioxide, and more	Does more than just filter your air, provides fresh, filtered air from outside to prevent the build-up of carbon dioxide and other gasses which air filtering can't help with.
Latest sensor technology	Contains sophisticated sensor technology for a wide range of pollutants, chemicals, particles, and air quality. Measures much more than typical air quality sensors.
1-year warranty	For peace of mind. Optional 5 and 10 year extended warranty available.
FSA and HSA eligible	People with respiratory issues can use their FSA or HSA funds when purchasing (requires a Letter of Medical Necessity from your doctor).
Save with solar	Save \$\$\$\$ on heating and cooling costs, airQ users get an average of \$800 free heating and cooling per year, with some receiving over \$1,500 (based on \$0.32 per kW/h electricity and equivalent energy provided, depends on home construction, location and installed airQ options).
Designed and assembled in California	Made especially for Bay Area homes and climate conditions.
